** September MS Predictions MMMonVHF **

Even if no big meteor showers hit the Earth in September, this
month deserves lot of interest by MS enthusiasts. Sporadic Meteors
flux is at its annual maximum in this period, thus providing
relatively good rates especially during morning hours. Some minor
to medium showers (Alpha-Aurigids, September Epsilon-Perseids,
Sextantids and others) will also add significant meteor rates.
Have a look to shower predictions for September 2011 at our MMM
MS-Propagationpage: http://www.MMMonVHF.de/ms.php
